

Australian designed and manufactured **Autoflo Integrated Goose-Neck Sensor Tap** is suitable for a range of hand-washing applications, particularly in public commercial areas that experience high traffic and therefore high usage, meaning conservation of water is of paramount importance. The 6-star WELS rating ensures hygienic bathroom environments for users, delivered economically and in an environmentally sensitive fashion.

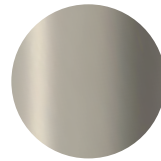

The robust construction, sleek design is complemented by a range of features ensuring consistent performance. The ability to self-range to its environment, the hygienic self-flush performed every 24-72 hours are just some of what sets the **Autoflo Integrated Sensor Tap** apart from other visually similar taps on the market.
